HADIA SHAHJAHAN

FRONTEND DEVELOPER

Sialkot, Pakistan | +92 334 7042123 | hadiashah010@gmail.com
Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Frontend Developer focused on building responsive, accessible, and user-friendly web experiences. Hands-on project experience with HTML, CSS, JavaScript, React, Next.js, and Tailwind CSS, including multi-page business websites, reusable UI components, API-driven interfaces, and technical SEO.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React, Next.js (App Router), Tailwind CSS, Bootstrap (basics)

Web Development: Responsive design, reusable components, DOM manipulation, Fetch API, REST API integration, form validation

Tools & Practices: Git, GitHub, Vercel, semantic HTML, accessibility fundamentals, metadata, XML sitemaps, JSON-LD

SELECTED PROJECTS

Aaira Khan Salon & Studio | **Live Demo**
Next.js, React, JavaScript, Tailwind CSS
- Built a responsive salon website presenting services, offers, gallery, testimonials, FAQs, and location information.
- Organized the interface with reusable components, centralized business content, and WhatsApp-based appointment inquiry flows.
- Implemented page metadata, local-business JSON-LD, robots directives, and an XML sitemap.

Fast & Furious Cafe | **Live Demo**
Next.js, React, Tailwind CSS, TypeScript
- Developed a multi-page restaurant website covering Home, Menu, Deals, About, and Contact & Location.
- Implemented menu browsing and search/filter interactions, centralized business/menu data, and external Foodpanda ordering.
- Added page metadata, restaurant JSON-LD, robots configuration, and sitemap support.

Personal Portfolio & Admin Dashboard | **Live Demo**
Next.js, React, TypeScript, Tailwind CSS, Supabase, Prisma
- Built a responsive portfolio with About, Projects, Journey, and Contact pages.
- Implemented a validated contact form and admin-facing message management interface, with authentication and email-notification integrations.

LearnHub | **Live Demo**
Next.js, React
- Built a learning-platform project using Next.js App Router, with shared layouts and route-level loading, error, and not-found states.
